Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2627

In response to applicant's filing dated December 10, 2003, the following action is taken:

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-18 are rejected under 35 U.S.C. 102(b) as being anticipated by JP 2002-260226.

The independent claims merely read on delaying the starting time period and the ending time period of a recording pulse signal when recording marks on a disk. The disk is a well-established phase change. The reference shows an optical disk recording apparatus wherein the starting and ending edge of the recording pulse is delayed by a predetermined amount as shown in fig 3.

With respect to the limitation of claim 2 see fig 3 elements tp and ep during the 4T mark recording.

With respect to the limitations of claims 4-6. The claims read on corresponding the delay period with the linear velocity of the disk. The reference as stated in the abstract discloses the use of multi speed recording and the manipulation of the starting and ending edge pulses accordingly.

With respect to the limitations of claims 7-9. The claims merely read on an erasing power being more than the recording power. Such limitation is well established in the art.

Art Unit: 2627

With respect to the limitations of claims 10-18. The claims "linear velocity" correspond to the CAV disk being changeable as the beam is moved from the inner to outer peripheral of the disk.
